

Join new club

(1st design)

5px { Name <type="text">

20px X { Username: <type="text">

(margin-bottom)

<label> Current password </label> <type="password">

<label> Join a new club </label>

-- Select a club ---

<label> Why do you want to join this club </label> <type="text">

width 100 %

Save

drop-down

✓
Club 1
Club 2
Club 3.

input {type="submit"};

background-color: darkgreen;

margin: 0 auto

// set position center.

display: block;

color: black; }

If a person join club A, club A will be removed from the list to be only club B and C and consequently.

(using javascript)

Chi> Manage Account </hi>

<label> Name </label> (type = "text")

 <label> New Name: </label> (type = "text")

 Username: (type = "text")

 New Username (type = "text")

 Current password (type = "password")

 New password (type = "password")

 Save

border: solid

 width: 100%

 padding: 10px

 background-color: green

 color: black

 padding: 10px 20px

 width: 100%

create new ID

500 px.

- Note
- 1) Create one more label for ID.
 - 2) ID will be assigned once user ~~creates~~ sign up for account so no need to creat new ID.
 - 3) After clicking "save"; ~~the~~ an email will be sent to notified users that their account have been changed.

Admin_create_new_admin.html.drawio

<h1> Create new admin </h1>

~~100px~~ 100% (width)

Name

Username: <Label>

Current password <type = "password">

ID: <type = "text">

Phone Number <type = "number">

Save

} 20px

input(type = "submit")

- admins will be sent an email to a link so they can create their new password and username. (use the same form as this).
- (Have the same structure as join new club. and manage ~~new~~ account).
- (However it will only be accessed by admin at admin viewer site).
